Hierarchical Structure of JIRA activities

Epic:

When the stakeholders are given their requirements, those requirements are grouped by similar items, these groups are called Epics. An Epic is a big item, it consists of multiple user stories, tasks, bugs. A project can have multiple Epics.

Story:

Story or user stories are the requirements of the users given in the format of user perception like, “As a new user, I want to register my account so that I can access the app.”. An Epic will have multiple user stories.

Task:

Task is the actual work a developer needs to do to complete a user story. A user story may have multiple tasks. Tasks also sit under the Epics.

Bug:

A bug is used to track the defects during development in any epic. Bugs also sit under an Epic.

Sub-Task:

Sub-Task is used to split an item into multiple sub tasks. That item can be a story, task ,bug.
